

2022 SUMMER INTERNSHIP PROGRAM

In the inaugural summer of Archer's formal internship program, we had the pleasure of working with three interns who gained real-world experience that complemented their college coursework and enjoyed working closely with their managers and teams. We'll let them fill in the rest below!

Andrew Humphrey
CLIENT SERVICES

New Jersey Institute of Technology
FinTech major

This internship provided an amazing opportunity to work with higher level management at Archer as well as offering me irreplaceable experience in the Fintech industry. What I loved most about Archer was the culture and the people.

I didn't know what to expect coming into Archer's first year of an official internship program, but everyone that I have met was incredibly supportive and they all looked for ways for me to be included, whether it was projects or social events. I believe that in my 12 short weeks at Archer, I learned more than I would have anywhere else.

Jacob Larmer
TECHNOLOGY

Rowan University
Computer Science major

I really enjoyed the work I got to do as a software development intern, and overall felt comfortable and confident with the tasks that I was given. I liked how I got to have useful 1-on-1 time with my manager and other members of the team to ensure I was completing assignments correctly. They were all amazing help.

It was a fun surprise to take a deep dive into all the code as a backend developer and discover what makes everything run so smoothly at Archer. Overall, I have loved my time here and appreciate the opportunity to grow as a software developer.

Maddi Steinhilb
MARKETING

West Chester University
Marketing major

What I liked about Archer is that I'm able to be on a first name basis with a lot of the executive team, even as an intern. Everyone is very helpful and approachable, and I really like how transparent they are with the rest of the company.

I also like how committed Archer is in making sure their employees succeed. Seeing how driven my team is to help each other and make everything they do the best it can be is very cool and I know the rest of the company is also committed to success. Overall, I'm grateful for how hands-on I was able to be and how much I grew personally and professionally.
